* IBO speed ratings are the industry standard and are calculated by shooting a 350-grain arrow using a 70# bow with a 30" draw. Speeds for the RazorEdge are achieved using a 300-grain arrow shot at 60# with a 29" draw. Speed for the Nuclear Ice was obtained using the arrows included in the Arctic Accessory Package at 29# with a 24" draw.

Performance testing is completed using a Custom Chrono, Heavy Duty ProShop Meter and digital scales (digital scales have a variance of +/- 1%). Speed ratings have been obtained with factory installed brass nock and Hush Kit. The use of these accessories decreases velocity by 5-8 fps.

All Packages come with factory installed accessories and are test-fired and ready to shoot, except the Boondocks and Arctic Package. Standard finished is Realtree Hardwoods HD® with InVelvet™ protective coating.
